Dear Ms. Green,

In response to your inquiry regarding Jay Tschetter of Images In Brick, let me first express what a pleasure it has been to work with Jay over the last year on our Public Safety Memorial project. I belong to a committee dedicated to enhancing our community's public art and was first introduced to Mr. Tschetter's work via my research on the internet. I was interested in a brick mural wall and researched several other artists which specialize in this field. Of the other artists I researched, none matched Mr. Tschetter's skill and style.

Our project, similar to yours, involved the arrangement of multiple historic images. Mr. Tschetter and his team helped arrange these images in a meaningful and dramatic composition. Pleased with his work on the composition, we hired Mr. Tschetter to carve these images in brick and actually create the murals that would become our memorial.

The carved murals Mr. Tschetter created are stunning. Mr. Tschetter kept our committee apprised of the mural progress and worked with us to quickly correct any details we wished addressed. Mr. Tschetter's expertise, professionalism & craftsmanship exhibited throughout the entire design, carving and installation process was exceptional.

The village is proud to be nearing the completion of such a fine memorial dedicated to our public safety employees and feel fortunate to have been able to work with such a gifted artist as Mr. Tschetter. If you have any additional questions regarding Jay Tschetter or Images In Brick, please do not hesitate to contact me directly at (847)923-3866.

Sincerely,
The Village of Schaumburg
